SUMMARY

Experienced Android Developer with 8+ years of building scalable, user-focused mobile apps across fintech, airline, and retail sectors | including **Qantas**, **Central Group**, and **Huawei**. Specialized in Kotlin, Jetpack Compose, and Android Architecture Components. Passionate about creating seamless digital experiences and contributing to platforms that enable open access to financial ecosystems.

TECHNICAL SKILLS

- **Languages:** Kotlin (primary), Java
- **Cloud:** Jetpack Compose, XML, Material Design, Lottie
- **Backend/API Integration:** REST, GraphQL (Apollo, ktor, Retrofit), Firebase (FCM, Analytics)
- **Testing:** JUnit 5, Espresso, Mockito, Robolectric, Kotest, Paparazzi, LeakCanary

WORK EXPERIENCE

Senior Android Developer— Thoughtworks

Oct, 2023 { Mar, 2025

A global tech consultancy delivering impact through design, engineering, and AI.

- Delivered critical bug fixes and new features for Qantas Android applications, ensuring seamless functionality and high user satisfaction.
- Developed Android features using Kotlin and collaborated on backend services with Kotlin + Spring Boot for efficient full-stack delivery.
- Contributed to the migration from JUnit4 to JUnit5, modernizing test infrastructure and improving test coverage.
- Built server-driven UI promotions (Frequent Flyer, Double Points) with Jetpack Compose and Coroutines.

Android Engineer— Central Digital

Mar, 2022 { Sep, 2023

A subsidiary of Central Retail Corporation - Central Group, Thailand's largest retailer

- Led the T1 Payment Migration for Central App, streamlining the payment system and improving the user experience.
- Developed features, fixed bugs, and refactored codebases for Central, TopsOnline, and Supersports apps.
- Introduced Jetpack Compose UI and launched a new homepage for the TopsOnline app.
- Collaborated with designers on Supersports app reskin for a modernized UI/UX.
- Created a centralized network module for Central, TopsOnline, and Supersports apps to unify API handling.

TECHNICAL HIGHLIGHTS

- Implemented Android Architecture Components like LiveData, ViewModel, and Coroutines in all major apps.
- Monitored app responsiveness and UX across multiple apps; implemented optimizations and error tracking.
- Conducted daily code reviews to uphold Kotlin standards and ensure code health.
- Handled compatibility, optimized layouts and device support for various screen sizes and OS versions.
- Built and integrated APIs using libraries such as Ktor, Retrofit and Apollo GraphQL, with third-party SDKs like Firebase and Huawei services.
- Used GitHub, GitLab, and Bitbucket for all version control tasks, feature branches, and code reviews.

EDUCATION

University of Computer Studies, Pyay

2013 - 2017

Bachelor of Computer Technology

ACHIEVEMENTS

- **Samsung Tech Institute Mobile Training - Grand Winner (2016)**
- **Huawei Technologies Myanmar - Light of HMS (2020)**
